CATEGORIZATION

1. Strong Explicit Slurs (High Precision ≥ 0.90)

IDs: ID001-ID003, ID006-ID007. LIME scores: bhenchod (-0.83), gandu (-0.77), randi (-0.69).

2. Context-Dependent Terms (8-10% False Positive)

IDs: ID004-ID005, ID010-ID011. Can be friendly or insulting based on relationship.

3. Religious/Culturally Sensitive

IDs: ID008-ID009, ID020-ID021. Blasphemy law sensitive. Domain precision: 0.89.

4. Evasion Variants (Misspellings)

IDs: ID012-ID019. Deliberately altered to bypass filters. Caught by CNN-Gram layers.

5. Gender-Specific Terms

IDs: ID011, ID022-ID024. Severity varies by target gender and speaker relationship.

6. Political Context-Specific

IDs: ID025-ID027. Pakistani political context. Domain precision: 0.92.

TECHNICAL NOTES

Dataset: RUHSOLD (10,013 posts, 46.6% hate, 53.4% non-hate, Cohen kappa=0.78)

Orthographic Variation: 40-50% spelling variation in Roman Urdu

Code-Switching: 40-50% of content mixes English with Urdu

Model: BERT+CNN-Gram+LIME (F1=0.89, ROC-AUC=0.93, MCC=0.86)

Language Key: RU = Roman Urdu, AR = Arabic

Research Context: Department of Computer Science, University of the Punjab, Lahore. Terms extracted from RUHSOLD dataset for hate speech detection research.
